

## How To Guide for How Long To Beat

### What's the purpose?

This program is extremely purpose built in giving the user an estimation of how long each session would be in order to finish a game within a set amount of sessions.

**Example:** You are attempting to fit the game in question into a Livestreaming schedule and are wanting to figure out how long each Stream (or session) would likely have to be.

---

### How does it work:

1. In the upper "Enter length of game?" box, enter the estimated length of the game.
2. In the lower "How many sessions?" box, enter the amount of sessions you plan on committing to.
3. Press that "Estimate Session Length" button and off you go!
